Work Experience

Web Developer   February 2016 - Present
Doejo — Chicago, Illinois
- Handle development of client projects across the entire stack
- Create internal tools and resources to help enable others across the organization
- Serve as a resource for junior developers through pair-programming and code reviews

Web Developer   September 2015 - February 2016
GoHealth Insurance — Chicago, Illinois
- Created and updated sites used in paid search, display advertising, and affiliate marketing efforts
- Coordinated with external clients to create branded gateways onto our platform
- Generate technical documentation and recommendations for future improvements on multiple legacy code bases

UI/Front-End Developer   November 2014 - September 2015
Packback — Chicago, Illinois
- Designed and implemented responsive views for projects built using AngularJS & Laravel
- Built and maintained the Bower package used for styling across all company projects
- Provided ad-hoc updates to Laravel API microservices
- Created build processes in both Grunt and Gulp
- Reviewed and provided guidance for teammates' code within my area of expertise

Web Developer   August 2014 - July 2015
Freelance — Remote
- Worked with clients to implement new site features and resolve existing issues
- Identified and fixed cross-browser functionality problems
- Fixed front-end build process issues

Web Developer/Designer   April 2012 - July 2014
Links Technology Solutions — Schaumburg, Illinois
- Provided JavaScript development for various projects
- Converted static visual design documents and wireframes to fully functional sites
- Handled occasional graphic design work which consisted primarily of asset manipulation/creation
- Made content updates to existing sites on numerous different platforms and technologies
